PO

When measuring ensure the bay is a continuous curve & does not include any straight sections, as shown in the diagram. In these instances a template will be required.

Where possible photographs of the bay are useful as an additional check to confirm bay shape.

If in doubt please discuss with the sales team.

DIRECTIONS FOR MEASURING A BAY

- 1 Use a metal tape measure and ensure you have help.
- 2 Measure the wall at the height the pole will be fitted.
- 3 Mark measuring points lightly with pencil to ensure consistency.
- 4 Measure wall dimensions not pole dimensions.

BRADLEY BAY CHECKER +
Bays can also be measured using our app

Scan the QR code or search in App Store & Google Play
